SHERWIN-WILLIAMS.

Technical Data Sheet

DH1311-91219 Care Top 85 Base A

Product description

Two pack solvent borne topcoat for furniture and fittings. Meets high demands such as high build, toughness and appearance. Low formaldehyde emission during application, drying and from dried surface. Product for high gloss surface. The clear base, DH1311-90249, is approved for exterior doors together with the hardener DV061

Recommended application and Peak/Energy values will be stated in the finishing instruction/process control submitted by technician. General information According to Swedish legislation we provide information regarding dangerous materials. The Safety Data Sheet contains facts about the components, primarily solvents and acids which prime dangerous characteristics. The Safety Data Sheet will be sent on request. All values and recommendations above are to be considered as guidance only. Many factors beyond our cont may have an influence on the coating result. Should a problem arise, please contact us and we will advise accordingly. We reserve the right to alter the above specifications.
